

# The trusted solution for progress claims

Payapps is a cloud-based construction software that brings main contractors and subcontractors together to simplify and speed up progress claims and approvals, including retention and variations. Payapps ensures greater transparency, increased accuracy, improved compliance, reduced financial risk, fewer disputes, and fairer outcomes.

Trust our award-winning construction technology

**GOOD DESIGN AWARD**

# Make progress claims simple with Payapps

## Standardisation

- Eliminates different claims format submissions via spreadsheets and other methods
- Reduces progress payment approval processing time by 50%
- Reduces calls and emails from subcontractors chasing progress payment approval status
- Eliminates time-consuming reconciliations

## Compliance

- Ensures compliance with regulations such as SOPA
- Reduces financial risk with a full audit trail and document compliance

## Variation Management

- Protects margins by simpler yet more robust management of variations

## Retention Management

- Total visibility of retention funds across all projects to better manage your cashflow liabilities

## Relationship Management

- Improves working relationships with subcontractors - reduces friction, disputes, stop works and legal action
- Reduces risk of under and over payment

## Single Source of Truth

- Eliminate the need for duplicate data entry by directly integrating with your existing ERP, either natively or via our public APIs

## Time savings through progress claim automation

### What difference can these time savings make to your business?

- Focus on strategic initiatives
- Realign teams to focus more high value tasks, increasing productivity
- Take a proactive approach to subcontractor management
- Attract the best new talent with the leading solution in the market
- Employee retention - provide your team with the best tool for every task, including managing payment claims

"What used to take us an hour now takes five or ten minutes. We've seen an amazing return on our investment and the guys in the field love it."

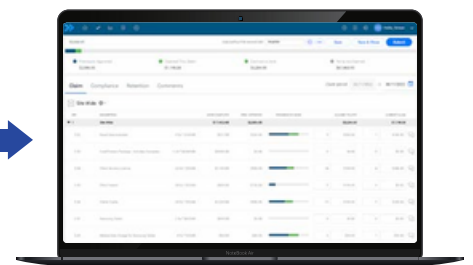

**Vlad Baltovski**

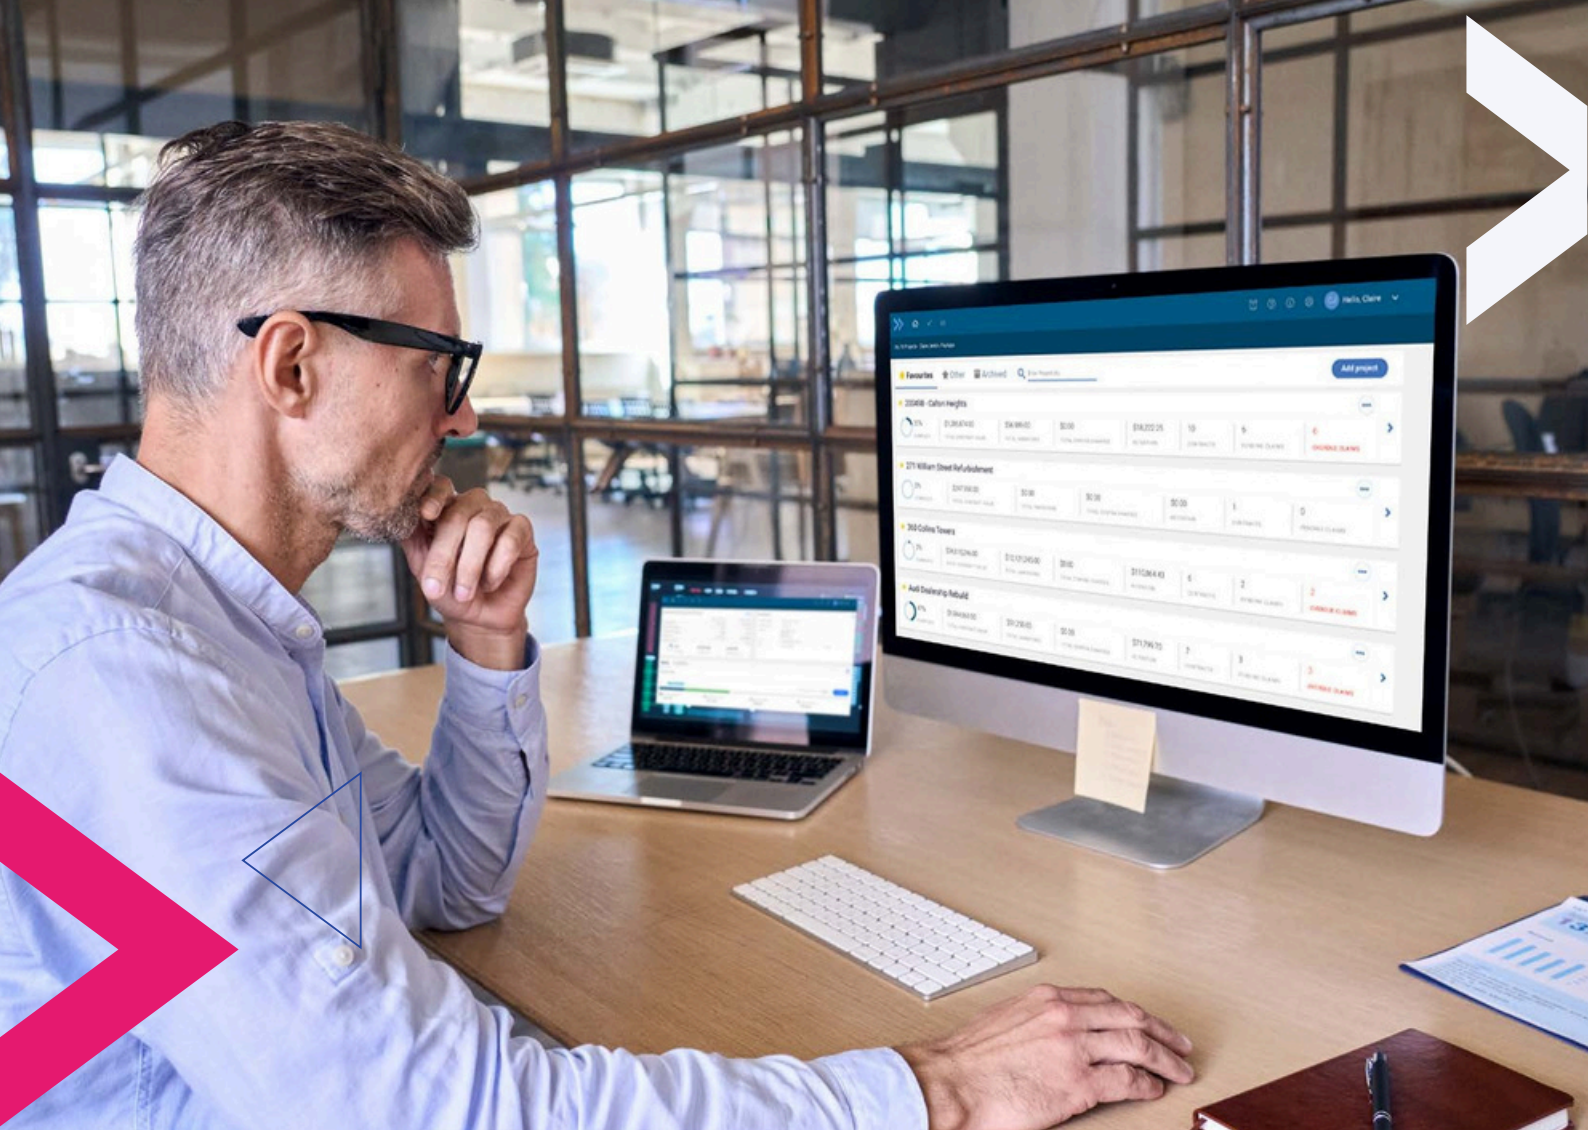

Commercial Manager, Parkview

## Why subcontractors love working on your projects with Payapps

Payapps frees up subcontractor time so they can get on with the job and improve the accuracy and consistency of submitting payment claims.

### Benefits of Payapps to subcontractors include:

- Facilitates timely preparation and submittal of claims
- Improves visibility of payment claims status and approval
- Reduces admin overheads and improves their relationship with the main contractor - no stress, angst or potential legal disputes, everyone is on the same page
- Platform for reporting and managing variations
- Better visibility of retention funds to help manage cashflow
- Auto-creation of invoices from approved claims
- Integration with popular accounting software MYOB, Xero and QuickBooks eliminates double data entry

---

“If you want to be on top of your Projects’ Progress Claims, Payapps is definitely the “go-to” tool/software. It’s very efficient and it’s very user-friendly. And if you ever get stuck on anything, the friendly team behind the scenes are always happy to help and they never fail to provide great customer service. Our team at Abbey Glaze highly-recommends this amazing software. Try Payapps for yourself so you’ll know exactly how it feels to have one less thing to worry too much about.”

**Jammy Cruz**

Administrator, Abbey Glaze
