MAIN CONTRACTORS

The Trusted Solution for Assessing Progress Claims

Payapps is award-winning construction software that simplifies how main contractors and subcontractors submit, assess, and approve progress claims. From contract variations to retention tracking, Payapps brings consistency, accuracy, and transparency to every step—helping you save time, reduce risk, and maintain project momentum.

Six Reasons the Best Use Payapps

1 **Save Your Team Time**

Standardise claims and reduce processing time by up to 50%. No more chasing inconsistent subcontractor submissions or rekeying spreadsheets—Payapps streamlines it all with automated workflows and digital claim formats.

2 **Streamline Variations Management**

Easily document, track, and approve contract variations in real-time, reducing administrative burden and managing project costs more efficiently to protect margins.

3 **Mitigate Risk & Ensure Compliance**

Meet the regulatory requirements of SoPA (Australia) and CCA (New Zealand) with automated reminders, approval workflows, audit trails, and built-in subcontractor compliance documentation.

4 **Increase Project Visibility**

Track claim statuses, retention funds, and approved variations in real-time. Make proactive decisions and avoid costly surprises.

5 **Seamless Collaboration**

Keep all stakeholders –subcontractors, and your team, including project and finance teams – on the same page, fostering transparency and minimising communication hurdles and disputes.

6 **Integrate with Construction ERPs**

Seamless integration to ensure data consistency and streamline your overall project management processes. Reduce duplicate data entry, minimises errors, and enhances overall productivity with smooth data flow between systems.

81%

Say Payapps makes it **easier for them to comply** with payment deadline obligations under SOPA/CCA.[1]

> "When I started in the business I inherited a massively complex macro-enabled spreadsheet that caused all sorts of problems. Payapps has made the payment claim assessment and approval process so much simpler and faster."

**Arend Kok**
Project Performance Lead, Laing O'Rourke

Integrate with your Existing ERP or Accounting System

Payapps is built for the construction industry, and seamlessly connects with leading construction ERPs and project management, accounting, and financial software used across Australia and New Zealand.

Save Time
Enter data once and get accurate project payment information across your business.

Better Governance
Filter outstanding and pending claims not yet synced with your ERP so nothing slips through the cracks.

Improve Accuracy
Reduce the risk of human error. Automatically match data between your ERP and the payment schedule for faster processing and payment.

Improve Accessibility
Give staff the ability to approve pending claims without unnecessary access to sensitive systems or compromising security.

> "Once we saw how the integration with Jobpac worked, there wasn't really a need to look at any other system."
