

Prepare and submit progress claims quickly and easily

Payapps is cloud-based construction software that helps you prepare and submit progress claims to your clients easily and on time. It also enables you to keep track of your claims to improve business cash flow.

Payapps makes the preparation and submission of payment claims much easier for subcontractors, and expedites review and approval by main contractors, including for variations and retention.

Payapps can manage all your progress claims regardless of whether your client uses Payapps. How you use Payapps will differ if you are using it with your client (we call this “invited”) or as a standalone (we call this “self-managed”) system.

Trust our award-winning construction technology

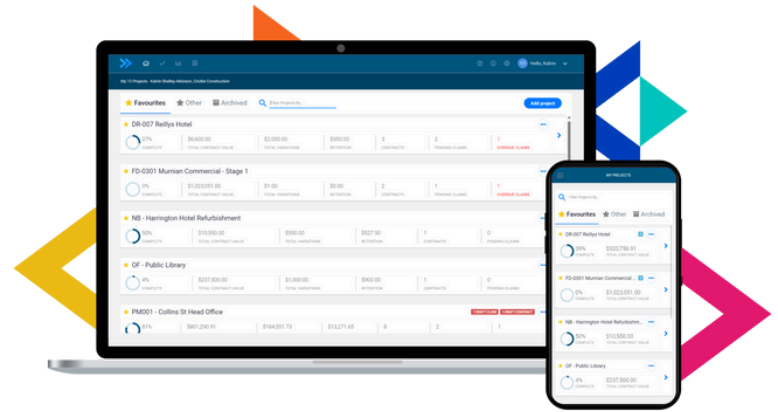

Why subcontractors love Payapps

Payapps frees up your time so you can get on with the job and improve the accuracy and consistency of payment claims.

Benefits of Payapps to subcontractors include:

- Facilitates timely preparation and submittal of claims
- Improves visibility of payment claims status and approval
- Reduces admin overheads and improves your relationship with the main contractor - no stress, angst or potential legal disputes, everyone is on the same page
- Platform for reporting and managing variations
- Better visibility of retention funds to help manage cashflow
- Auto-creation of invoices from approved claims
- Integration with popular accounting software MYOB, Xero and QuickBooks eliminates double data entry

We help you get onboard quickly and easily

Payapps has a comprehensive onboarding process that helps subcontractors get up and running fast. With a range of detailed Help Resources including comprehensive training, you can enjoy the benefits of streamlined payment claims and can submit standardised and accurate claims each month.

“It saves a ton of time and streamlines the process. It gives us a real sense of security that we are claiming the correct values and that everything is accurate. It enables us to track everything.”

Radi Pelemis
Managing Director, Westplex

With less worries about getting paid, you can focus on your projects. Payapps is an important step in helping you digitise your organisation to become more efficient.
